SENIOR SOFTWARE / PHP DEVELOPER

Company Overview

The company is building a brand management platform, with a focus on providing rights holders and sponsors a conduit to guide and gauge their digital brand effect around live events. The aim is to create technology that allows event organisers can use to interact directly with fans via a mobile app and reward the fan experience.

Role Overview

The company is looking for a senior software engineer / PHP developer that is open to the challenges of a start-up experience in a full-time role based out of our Dublin office.

The platform currently consists of an admin dashboard and native iOS and Android apps which communicate with our API. The dashboard focuses on content management and reporting on social media engagement generated by our users

The ideal candidate will take ownership of technical challenges, taking a hands-on approach to modernising and improving existing PHP code-base. Responsibilities will include taking ownership of the dashboard and APIs, furthering their development from both a front-end and back-end perspective.

Experience of managing the integration of API's into a native mobile experience, as well as driving the development of SDK's (via our mobile developers) is an upcoming priority for 2016.

Key Technical Requirements include:

- Significant PHP development experience (you will be required to continuously improve the codebase and manage new requirements)
- Moderate experience with HTML/CSS and JS
- Moderate experience with MySQL & Apache HTTP Server
- Experience with version control systems (VCS), specifically Git
- Experience with issue management to track bugs and features, and to report on current progress
- Working knowledge of continuous integration and continuous deployment concepts
- A self-starter attitude, someone who takes obsessive ownership of problems to find workable solutions

Nice to Haves

- Experience with Yii PHP Framework - <http://www.yiiframework.com/>
- Experience with AWS
- Knowledge or interest in Mobile UX concepts
- Knowledge or interest in the area of API Design and Architecture

Still here – you must be interested!! Send an email to: info@crowdsight.co with your CV and a brief cover letter letting us know why you're interested and what you feel you can bring to the role.
